GREEN RENTAL

Design Concept

The design is based on its function, to create a web for renting a car. The brand is to bring out the concept of environmental friendly. Therefore, the key of the design is to bring up a user-friendly and easy-to-use web which suits the theme of 'green'. In this web, we hope to give our target audience the vibe that our brand is 'young', 'energetic' and 'modern'.

User Story

As a car-renting user, I want to rent a car easily, in which it means I can just pick the date and car and complete my renting process.
